## RAINFALL REPORT

The pluviometer at the Laboratories registered .890 inch of rainfall last week. During a similar period last year no rainfall was registered.

## BEWARE OF GLARE

The bright summer sun can do more than make you warm. It can create a blinding glare that makes driving difficult, to say the least.

When faced with this hazard cut your speed just as you would when darkness sets in.

Sun glasses are an effective glare neutralizer. A good pair can cut sun glare considerably. Don't forget to take them off when the sun goes down, though.
